About me

My research interests lie in the area of spatiotemporal data management and flow analytics in large graphs, with a particular focus on a new class of networks called Temporal Interaction Networks (TINs). These networks model dynamic systems where entities exchange quantities, such as financial transactions, transportation flows, or communication data.

Over the past few years, I have been developing efficient solutions to optimize classical problems—such as max-flow computation—by introducing the temporal dimension. Currently, my work focuses on data provenance analytics in large graphs, with an emphasis on designing techniques to trace the origin of transmitted quantities in graph-structured data.

Recently, I have also started exploring the Text-to-SQL domain, focusing on addressing challenges related to text ambiguity in natural language database queries.

Employment

Hong Kong University of Science and Technology, Hong Kong SAR May 2025 – present
Postdoctoral research fellow, CSE Department
- Working on projects related to spatiotemporal data management and data provenance on graphs

University of Hong Kong, Hong Kong SAR January 2025 – May 2025
Part-time Lecturer, CS Department
- Teaching a course at the master program of the department

University of Hong Kong, Hong Kong SAR Aug 2023 – April 2025
Postdoctoral research fellow, CS Department
- Working on projects related to spatiotemporal data management and graph analytics

University of Hong Kong, SAR Jun 2022 – Oct 2022
Research Assistant, CS Department
- Worked on developing spatiotemporal data management algorithms for a funding project with MTR

University of Ioannina, Greece Oct 2020 – May 2023
Software Developer, CSE Department
- Worked on a research funding project called SmartCityBus.

University of Ioannina, Greece Apr 2020 – Sept 2020
Software Developer, CSE Department
- Worked on a research funding project called ProximIoT.

University of Hong Kong, SAR Aug 2019 – Oct 2019
Research Assistant, CS Department
- Worked on developing optimized algorithms for flow computation in temporal networks

University of Ioannina, Greece Mar 2019 – Jul 2019
Software Developer, CSE Department
- Worked on a research funding project called Seek and Go.

University of Hong Kong, SAR

Research Assistant, CS Department

Aug 2018 – Dec 2018

- Worked on developing optimized algorithms for enumerating flow motifs in temporal networks

Education

Ionian University, Greece

BS in Computer Science

Sept 2013 – Sept 2017

- **Thesis:** Sentimental Analysis in Social Networks
- **Advisor:** Phivos Mylonas

University of Ioannina, Greece

M.Sc in Computer Science

Oct 2017 – Feb 2019

- **Thesis:** Flow Motifs in Interaction Networks
- **Advisor:** Nikos Mamoulis

University of Ioannina, Greece

Ph.D in Computer Science

Feb 2019 – Apr 2023

- **Thesis:** Flow Analytics in Large Graphs
- **Advisor:** Nikos Mamoulis

Teaching Experience

The University of Hong Kong, SAR
Course Title: Network Data Analytics

Spring 2025

- *Instructor*

University of Ioannina, Greece
Course Title: Complex Data Management

Spring 2019-2023

- *Teaching Assistant*

University of Ioannina, Greece
Course Title: Object Oriented Programming

Spring 2018

- *Teaching Assistant*

University of Ioannina, Greece
Course Title: Introduction to Programming

Fall 2017-2022

- *Teaching Assistant*

Skills

Programming Languages

C, C++, Python

Environments

MATLAB, Octave, QGIS, Neo4j

Operating Systems

Windows, MacOS, Linux
